

Appendix 2B (guidance) – Model pre-export identification check form (category 3 country)

This information must be completed by an official veterinarian employed by the competent authority of the category 3 country that the identification check was performed in. This information must be forwarded directly to the New Zealand Ministry for Primary Industries before an import permit can be issued. It can be uploaded to [MPI's Animal & Plant Import Permits website](#) directly.

Send this information to MPI via the Animal & Plants Import Permits application system after each scanning event.

The RNATT sample was taken between 6 and 12 months prior to the expected date of shipment. I have scanned and verified the microchip before or at the same time as the sample for the RNATT was taken on (date) or

The RNATT sample was taken at least 3 months but less than 6 months prior to shipment. I have scanned and verified the microchip before or at the same time as the sample for the RNATT was taken on (date)

1. I This is the first scan conducted at least 6 months prior to the expected date of shipment*; or

2. I This is the second scan conducted at least 3 months prior to the expected date of shipment.*.

*Choose which option applies to this scanning event.

To the best of my knowledge, the information provided is true and correct.
