VETERINARY CERTIFICATE FOR THE IMPORT OF DOGS AND CATS INTO SINGAPORE

For Schedule III countries/regions: all countries/regions other than those listed in Schedule I or II

NParks/AVS Import Licence No.: _____ Veterinary Certificate No. (if applicable):_____

N.B. A valid NParks/AVS Import Licence to import the dog/cat must be obtained before shipment.

SECTION I IDENTIFICATION OF THE DOG/CAT

Species: _____

Breed: _____

Name of animal: _____

Sex (please circle): Male Neutered Male Female Neutered female

Age or Date of Birth: _____ (animal must be at least 12 weeks of age at the time of export)

Colour: _____

[N.B. The following breeds and their crosses are prohibited for import: Pit Bull (including the American Pit Bull Terrier also known as the American Pit Bull and Pit Bull Terrier, American Staffordshire Terrier, Staffordshire Bull Terrier, the American Bulldog, and crosses between them and other breeds), Neopolitan Mastiff, Tosa, Akita, Dogo Argentino, Boerboel, Fila Brasileiro, Perro de Presa Canario and their crosses; Bengal and Savannah cat crosses of 4th generation and below.]

Microchip Number: _____

The animal has been scanned on _____(day/month/year) prior to export and found to be implanted with a microchip bearing the above microchip number, which is also reflected on the animal's vaccination certificate.

SECTION II ORIGIN OF THE DOG/CAT (indicate the option that applies)

After due enquiry I am satisfied that the dog/cat (delete as appropriate) identified in this certificate is not under quarantine restriction at the time of export.

SECTION III SANITARY INFORMATION

I, _____ (Name in BLOCK LETTERS), the undersigned veterinarian, being a Government approved veterinarian / Official government veterinarian (delete as appropriate) of _____(the country/region of export), certify in respect of the dog/cat (delete as appropriate) described above that:

General Vaccinations (strike out whichever does not apply)

The dog was vaccinated against Canine Distemper virus, Canine Adenovirus type 1 and Canine Parvovirus type 2, according to the vaccine manufacturer's recommendations and at least 14 days prior to export.

Date of vaccinations:

Canine distemper virus: _____ (day/month/year)

Canine adenovirus type 1: _____ (day/month/year)

Canine parvovirus type 2: _____(day/month/year)

The cat was vaccinated against Feline calicivirus, Feline Herpesvirus-1 and Feline Panleukopaenia virus according to the vaccine manufacturer's recommendations and at least 14 days prior to export.

Date of vaccinations:

Feline Calicivirus: _____ (day/month/year)

Feline Herpesvirus-1: _____ (day/month/year)

Feline Panleukopenia virus: _____(day/month/year)

Rabies Vaccinations and Serological Testing

The dog/cat was vaccinated against rabies using an inactivated vaccine or recombinant vaccine acceptable to NParks/AVS. The vaccination must be a valid primary vaccination or a valid booster vaccination in accordance with the recommendations of the vaccine manufacturer.

Date of rabies vaccination: _____ (day/month/year).

At least 28 days after the primary rabies vaccination or rabies booster, the dog/cat is subjected to a WOAH prescribed test showing a rabies neutralising antibody titre of at least 0.5 IU/ml, not less than 90 days and not more than 12 months prior to export. The rabies serology test must be conducted at either a WOAH Reference Laboratory for rabies or at a laboratory in a Schedule I or II country approved by the respective Competent Authority of the Schedule I or II country. A valid test report must accompany this certification.

Date of blood sampling: _____ (day/month/year)

Rabies neutralising antibody titre: _____IU/ml

Dog/cat imported under this protocol and fulfilling the above would be subjected to rabies vaccination on arrival and following which quarantine for a period of not less than <u>30 days</u> upon import.

External Parasite Treatment

The dog/cat was treated with a product effective against external parasites (fleas and ticks) between 2 and 7 days of export.

Date of treatment: _____ (day/month/year)

Name of product: _____

Active ingredient: _____

Internal Parasite Treatment

The dog/cat was treated with a product effective against internal parasites (nematodes and cestodes) between 2 and 7 days of export.

Date of treatment: _____ (day/month/year)

Name of product: _____

Active ingredient: _____

Pregnancy (for females)

After due enquiry I am satisfied that the animal is not pregnant at the time of export.

Prohibited breeds

After due enquiry I am satisfied that the animal is not one of the prohibited breeds or crosses as listed in Section I.

Clinical examination

I have examined the dog/cat and found it to be healthy, free from any clinical sign of infectious or contagious disease and fit for travel.

Endorsement
Sections I to III may be endorsed by a government-approved veterinarian or an official government veterinarian.

Signature: _____ Date: _____ (day/month/year

Name of government-approved veterinarian or an official government veterinarian (delete as appropriate):

Address, telephone, fax, email of practice:

_____

_____

_____

_____

SECTION IV (must be endorsed by official government veterinarian)

I, _____ (Name in BLOCK LETTERS), the undersigned veterinarian, being an Official government veterinarian of _____(the country/region of export), certify in respect of the dog/cat (delete as appropriate) described above that:

After due enquiry and examination of documents, the dog/cat is not under quarantine restriction at the time of export.

I have no reason to doubt the truthfulness of the information given in Sections I to III and am satisfied to the best of my ability that the dog/cat certified above meets with the requirements for importation into Singapore.

CERTIFICATION VALIDITY: This certification is valid for seven (7) days.

Signature: _____ Date: _____ (day/month/year)
